The dullahan waits, a question hanging in the air. How, exactly, can you prove you didn't take it?

There's only one way, of course. To prove your innocence, you must prove someone else's guilt. With a sinking feeling in your stomach, you force the bitter words out of your mouth.

You will help him find the thief.

Though his movements are subtle, some of the tension leaves the dullahan's shoulders and stance. You sense he is surprised and at least considering your proposal. On the one hand, you dread his acceptance—but on the other hand, it does seem to be your only chance to survive this encounter.

Perhaps a little additional convincing is in order? What might make your assistance valuable to the dullahan?

- My courage is unequalled. I will neither flee nor falter till my quest is complete.
- Deadly or not, this creature is clearly hurt by his loss. What is a dullahan without his head? I have no ulterior motives; I only want to help.
- For the right price, I am capable of anything. Even recovering a stolen head.
- I'll do anything he wants as long as he doesn't kill me! I will do his bidding without question, I swear!
- What happened to this creature, regardless of his nature, is wrong. My intentions are

This game is so imaginative and fun! Great puzzles, great little bits of dialogue, and most importantly: cats.. complete
. I did not enjoy my time with this game.

Voice commands did nothing to add to the experience for me. I went to using the mouse and keyboard because repeating myself did not feel great.

Units don't feel balanced. Am I to believe that 1 Riflemen unit out in the open with no cover can over power two groups of my Gunships? Once enemy infantry do take cover, you pretty much have to take them out with artillery or overpower them with 4-5 units. I don't understand why Riflemen function like superheroes. My Engineers can take cover and be destroyed by a single unit of tanks, but when the enemy does it, I have to bring everyone or make it rain brimstone.

Artillery > Riflemen > all other units. (Gunships are pretty fantastic at taking out Artillery unless they're protected by Riflemen.)

Upgrades in the singleplayer campaign don't feel like they do anything. They always felt underpowered against the enemy's equivalent and would lose in one-on-one's with me having an advantage. Some of the unit abilities are fun.

Camera angles are annoying and restrict you from making good calls. Having to switch between units to see what they see is tedious.

No online (pretty much).

Game looks nice.

Missions are samey.

Superweapons really hamper my ability to enjoy the game. I went out of my way to avoid the conditions that cause superweapons to trigger in matches. Did you have a couple units protecting a base? Boom, they're gone (as is the base/uplink). Oh, you spread them out and think they're safe. Boom, gone. Units can't move fast enough as the missile drops very quickly. It encourages spreading units out. Really out. Annoying at best.. A cautious recommendation. It's cool to see this front of the war, and this is an excellently crafted mod. However, the lack of faction variety (Japanese and Chinese are the only playable nations) and the fact that it's only for CoH 1 (which is significantly less refined than the sequel IMO) set this mod back.

If you want to play on the Pacific front of WWII and don't mind going back to the first CoH, you'll enjoy this mod. Otherwise, I would pass.. I spent some hours in this game and it is really not bad. Yes, it needs some fixes and improvement but it has good potential. The dev. team is responsive and issue fixes already. I will keep coming back to this game.. Thank you for bringing that game back!

I played this game when I was about 8-9 years old! Great game!

It even supports 21:9! :P. The game concept is awesome and a lot of fun! There are glitches that need to be addressed. My main complaint is you win 2 rounds and the game ends....please make it so you can set a custom number of rounds!. Bad game.

Controls are whack and you cannot choose any video options. And yes, the standard resolution is

I like the lack of information and how even when I managed to complete a level, I still didn't catch the pattern right away. I really enjoy these types of games that make you learn how to play. It teaches well. Also, I'm a fan of Cipher Prime anyway.. As a regular human, I express the human emotion of happiness by being able to play a completely standardized basketball experience on my personal computer for humans with my other regular human friends.. I bought that game long time ago - it wasn't cheap nor complete, but I thought the idea was very good and fascinating, and I wanted to help developers with this project. This is one of the games that convinced me in never buying an early access game ever again. It's totally abandoned. No graphic updates. No new content. Obviously no players, who would still playing it after all this time? Nowadays is a \u2665\u2665\u2665\u2665\u2665\u2665 and buggy game, and even if I would love to say "It'll get better, the idea is very good and it can become a great game!" I actually know there won't be future updates and improvements. There is no reason for which I should recommend you to buy this game. NO REASON. If you want to trash money, just put them in a WC. Don't buy that \u2665\u2665\u2665\u2665\u2665\u2665 stuff.. Inside this game, more is hidden than it seems. I will not hide that I like this game. I like how the series of games is being improved step by step. In the last game, developers basically improved the turn-based strategy. From this (the supply system) the game became deeper and more interesting. I see that the developers have taken care of the newcomers. I hope there will be more training videos.

I also would like the ship to be divided into separate parts: the hull of the ship, the steam engine and boilers, the shell of the shells. Now randomness plays an insignificant role in the battle. I would like to see the critical damage from the "golden shell". Maybe other accidents, like weather.

Separately, I want to thank you for the wonderful models of ships. These are the most realistic ships possible. Yes, "World of Warships" I'm looking at you.

Can I recommend this game to everyone? No I can not! Can I say that this is the "Total War" on the sea? No I can not. "Total War" is an arcade strategy for a mass player. This game is a mix of the old-fashioned simulator of naval battles and a wargame with unique rules.. Game not updated on Steam so after downloading 1.8GB on Steam you have to download tons more via game launcher which is always on the top in Windows and cannot even be minimized. Utter non-sense. Developers of this should find a different job. For example pilots. Kamikaze pilots.. The person who made the song recognizer is a genius, also looks a lot nicer than Beat Hazard. Reasonable. Not super.. This game looks really good and almost runs smoothly on each map.

However, I think I'm having some weird bug.

I have my mouse and keyboard all connected and working, but for some reason I can't control any of the characters in the game. I really want to play this fighting game, but as I can't control the fighter, they go into somekind of a demo/automatic mode and fight automatically.

Does anyone else have a similar bug?. SBBP is a game that doesn't even try to get out of the "f2p zone", speaking of quality. This game has "Very Positive" reviews only because it's free (thank god) but it seems like the developer made this game while learning one of those very simple engines like Game Maker or something similar.

Let's make a "bad feature list" for this game:

- Only four enemies (excluding bosses)
 - 2 bosses and 4 boss-fights: 2 encounters are just copy-pasted with the bosses' life increased
 - Animations and the graphic of the projectiles (those big white rectangles)
 - Troll level 10
 - Dull graphic style
 - 30 fps lock
- Only downloaded (and completed) this game for the achievements. I know it's a f2p game, but the quality level, here, is

very low.
